EDUCATION

Innopolis University Innopolis, Russia
Computer Science 2021 – 2025

- Networks
- Data Structures & Algorithms
- Databases
- Operating Systems
- DevOps

EXPERIENCE

Innopolis Innopolis, 2023
Backend Developer Python, FastAPI, Docker

- Developed backend server to improve Innopolis University room booking service backed by Microsoft Outlook API.
- Outperformed existing system
- Implemented additional functionality.

Advanced Web Scraper Project 2022
Developer Go, Lua, Web Scraping, Image processing, CLI

- Identified the problem with existing open-source solutions and developed web scraping program for comic sites with Lua extension-based architecture.
- 700+ stars on GitHub
- 10000+ downloads.

Document Converter Project 2022
Developer Rust, Websockets, CLI

- Investigated the lack of open-source programs for converting Markdown documents into portable HTML pages with embed images and live preview.
- Resulting app made process of submitting university assignments more productive.

SKILLS

🔗 Go · Rust · Python · Docker
Lua · JavaScript · Nix
Git · Linux · Shell
GitHub Actions · REST · GraphQL
MongoDB
Text Processing · Web Scraping

😊 Conflict Resolution · Flexibility
Teamwork · Engagement

🇬🇧 English · B2
